To Garment, Use Shing Ling Sewing Machine

# SL-900II

## 直驅電腦平縫機系列 Direct drive high speed lockstitch sewing machines series

SL-900II直驅電腦平縫機系列是一款新型電腦車。主要功能：手動倒回縫/自動倒回縫功能（針數0-9針），速度可調（1-9級），最高轉速5000轉。該機採用直驅系統，利用先進的自動控制技術。具有噪音低、振動小，節能省電，減輕人員的工作強度等優點，從而大大提高了縫制品質，是一款質優價廉的產品。

SL-900II Direct-drive computerized sewing machines-series is a new model. Main function:Go back in manually sewing;Automatic reverse stitching(PIN: 0-9-pin), Adjustable speed(Class 1-9), Maximum speed 5,000 rpm. This machine uses the direct-drive systems, Use of advanced automatic control technology. With low noise, minimal vibration, energy efficient, advantages of reduce operators work load. Thereby significantly improving the quality of sewing, is a quality and low cost of the product.

優點:

Advantages:

### 一、人性化設計:

#### 一、user-friendly design:

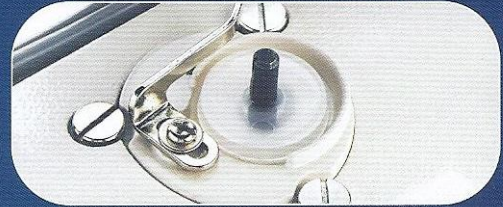

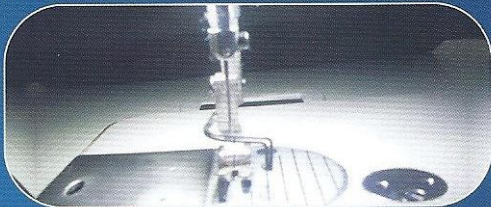

■ 方便調節壓腳壓力：調壓螺母，壓腳壓力數字量化控制，因此需要時可輕易準確設置。夾綫器螺母上刻有數字，方便調校。  
■ Easy to adjust the presser foot pressure: pressure-adjusting nut, presser foot pressure digital output control, accurate settings can be easily achieved. Clip engraved with the number on the hub nut, easy to adjust.

■ LED節能燈：採用節能環保的LED光源照明系統，無需外接電源，光源亮度三個檔位可供調節，以滿足不同布料加工對光源的要求。

■ LED energy-saving lamps: the use of energy-saving LED lighting system, the use of an external power supply, three stalls can be adjusted for brightness of the light source in order to meet the requirements of different fabric processing on light sources.

■ 方便的繞綫器裝置：繞綫器新式設計，安裝在機頭上方，方便繞綫拿取底綫。

■ Easy winding device: new design of winding, installed above the header to ease the winding to get the bottom line.

■ 皮帶輪的設計：採用內藏式的皮帶輪，外形專利設計，再也不用擔心頭髮、綫之類的東西繞進去了。

■ Pulley design: the using of internal pulleys, patented design appearance, no longer have to worry about things like hair, wire-wound etc.

■ 剪綫機構：穩定的切綫機構保證準確的切綫效果，不用調整即可保證較粗的切綫效果。良好的吃厚性能，可輕鬆縫制八層厚牛仔布料，適用性好。

■ Trimmer body: tangents of stable tangent institutions to ensure accurate results, guarantees the tangents of coarse effect without adjustment. Excellent thick material sewing performance makes it easy to sew eight layers thick denim, material, high capability.

### 二、直接驅動:

#### 二、Direct drive:

■ 本機採用直接驅動式馬達，可無損耗的直接傳動，使能耗損失降到最低，而且啓動快、運行穩定、停機準確、效率高、噪聲低、振動小。

■ This machine uses the direct-drive motors, direct transmission without loss of energy, minimizing energy loss and start fast, stable running, stopping accuracy, high efficiency, low noise, small vibration.

### 三、優良的節電性:

#### 三、excellent energy-saving:

■ 伺服馬達每臺機每年用電比普通馬達省電63.6%

■ Servo motor power is an efficient model, using 63.6% less energy than general motor power.

機器型號	適用範圍	機針型號	針數	綫數	針距 mm	壓腳高度 mm	轉速 s.p.m	體積 mm	重量 nw/gw kg
SL-900II	適用於縫制運動衫、皮包、錢包等	DB x 1 11-18#	1	2	5	5-13	5000	635 x 245 x 550	34.5 / 41.5
